*"John Kitto (1804-1854) was a British missionary and writer of religious books who was deafened at the age of 12 by a fall. While Kitto calls *The Lost Senses* "a natural history of my deafness" rather than "a biography of myself," the first volume of the work, which is focused on deafness, narrates how Kitto came to be deaf and his experiences as a deaf man both in England and abroad. The second volume, blindness, is not autobiographical (since Kitto was not blind) and turns its attention, instead, to experiences of, and texts about, blind people, including the famous American Laura Bridgman, and various blind poets, musicians and philosophers."--19th c.
